Safety Instructions:

- Do not exceed the maximum load capacity: 120 kg for the superstructure gantry, 40 kg for the stabiliser.
- Install and use the product in accordance with the instructions to avoid injury and instability.
- Keep children away and use under adult supervision.
- Before use, ensure that all components are securely and correctly mounted to prevent tipping and falls.
- Use only for the intended purpose and do not overload to avoid structural damage.
- Do not use on unstable, uneven or wet surfaces to ensure stability.
- Installation may only be carried out by qualified personnel or in strict accordance with the instructions.
- Check the product regularly for damage and wear; contact the manufacturer immediately in the event of damage.
- Ensure that superstructure components are securely mounted on the base table to prevent accidents.
- Observe protective measures against unintentional loss of stability and falls.
- Use the height adjustment in 30 mm increments to ensure stability.
- Before use, the workplace should be organised and free of obstacles to avoid tripping hazards.
