Safety Instructions:

- Do not exceed the maximum total load of the superstructure (120 kg).
- Limit the load on the boom to 40 kg.
- Use the product on a stable surface to prevent it from tipping over.
- Ensure that all parts are properly assembled before using the product.
- Ensure that all fastenings are properly tightened.
- Regular checks of the stability and safety of the superstructure are recommended.
- Product is not suitable for children; keep out of reach of children.
- Warning: Not suitable for children under 3 years of age (do not use as a toy).
- Observe the relevant safety precautions when using tools.
- Observe electrical connections during use to avoid electric shocks.
- Keep away from heat sources and aggressive chemicals to prevent damage to the powder coating.
- Pay attention to potential interfaces with other devices in order to minimise risks.
- Wear suitable protective equipment during use to avoid injury.
- Before use, ensure that all connections are correctly and securely fitted.
- Users should carefully read and follow these operating and installation instructions.
- The use of suitable protective equipment during assembly and application is recommended.
- Observe the safety instructions to avoid the risk of falling and injury.
- The maximum load of the superstructure must not exceed 120 kg.
- The maximum load of the boom is 40 kg.
- The instructions for installation should be followed carefully to avoid hazards.
- Ensure that the product is properly secured to the workbench to avoid the risk of falls and serious injury.
- Only use the product for its intended purpose in accordance with the instructions.
- Regular inspection of the stability and strength of the product is recommended.
- Correct attachment to the Universal Special and Profi Special series extension tables is required for safe use.
- Ensure that the product is properly assembled to ensure stability and safety.
