Safety Instructions:

- The table top is not suitable for work with high chemical or mechanical requirements.
- Maximum load capacity: 450 kg. Even load distribution is required.
- Make sure that the table is placed on a stable and level surface to prevent it from tipping over.
- Avoid overloading the table beyond the maximum load capacity of 450 kg.
- Keep children away from the hand crank and the table to avoid the risk of injury.
- Regularly check the stability and mechanical parts for wear and tear.
- Do not use any sharp objects or aggressive chemicals when working on the tabletop to avoid damage.
- Ensure safe use of the hand crank and check for correct function regularly.
- Ensure that the table top is suitable when using damp materials to prevent damage.
- The PVC decorative panel is flame-retardant (B1) in accordance with DIN 4102.
- To prevent surface damage, do not clean the table top with aggressive or abrasive cleaning agents.
- Keep the workplace free of obstacles to avoid the risk of tripping and falling.
- The surface of the table top should be inspected regularly for damage in order to minimise safety risks.
- Do not use as a means of transporting people and do not lay cables under the table as this could cause tripping.
- Risk of suffocation due to loose parts (e.g. screws), therefore always secure.
- Use suitable protective devices and non-slip pads over the rubber shoes to avoid the risk of slipping.
- The hand crank should only be operated by adults and should be checked for proper locking before use.
- Ensure that all screws and connections are firmly tightened before use.
