Safety Instructions:

- The safety instructions must be enclosed with the product and must be formulated clearly and comprehensibly.
- Read the instructions and safety information before use.
- The maximum load capacity of the chair is 110 kg. Ensure compliance with this limit.
- To avoid falls and injuries, make sure that the chair is stable on the floor.
- Height-adjustable elements should be set according to individual body height to prevent injuries and back problems.
- Excessive sitting time can be harmful to health; regular breaks and exercise are recommended, especially for use over 8 hours.
- Ensure that all moving parts are free of obstructions and carry out regular maintenance on mechanical parts to avoid injury.
- Check the parts carefully during assembly and ensure that they are correctly fastened.
- Smaller parts should be kept out of the reach of children to avoid the risk of suffocation.
