Safety Instructions:

- Observe maximum load: 110 kg to avoid injuries due to overloading.
- Recommended maximum sitting time: 4 hours to prevent fatigue.
- Product for use by adults only or under adult supervision. Children should be seated under supervision.
- Adjust the air pressure regulation according to the instructions and check regularly to ensure seat firmness and stability.
- Protect the stool from physical impact to prevent damage.
- Do not jump on the stool or move too much to prevent tipping.
- When using the exercise ball: Be aware of the risk of slipping on smooth surfaces; ensure correct handling of the air pump and pay attention to the risk of suffocation for children.
- Secure the product on a stable base and check regularly for damage in order to minimise risks.
