Safety Instructions:

- Due to its sturdy sheet steel construction, the product can cause injuries from sharp edges - ensure safe handling.
- The cabinet should only be used in accordance with the instructions provided for safe use, especially during assembly and transport.
- If children are present, use of the locker is only permitted under supervision; keys should be kept out of the reach of children.
- Use a security cylinder lock to prevent unauthorised access to the contents.
- Ensure that the cabinet is always placed on a stable surface and, if necessary, secured to the wall to prevent it from tipping over.
- Avoid overloading the compartments to prevent injuries and structural damage.
- Always keep doors closed to minimise the risk of injury from crushing.
- The air circulation through the perforated rosettes in the rear wall must not be blocked.
- Regularly check the stability and safety condition of the cabinet.
- Clean surfaces with a damp cloth to avoid damage.
