Safety Instructions:

- Make sure that the safe deposit box is stable on a level surface to prevent it from tipping or falling over.
- Avoid contact with sharp edges, especially on doors and corners, as these can cause injuries.
- The security cylinder lock should only be used with the keys provided and in good condition to prevent unauthorised access.
- Keep the cabinet dry and clean it regularly to prevent rusting and material damage.
- Only use the cabinet for its intended purpose and ensure that the compartments are not overloaded to avoid instability.
- When installing and transporting the cabinet, the manufacturer's instructions should be followed to ensure safe installation and handling.
- Keep the keys to the security cylinder lock in a safe place to prevent theft and unauthorised access.
- Keep the cabinet away from heat sources to avoid deformation and material damage.
- The product should not be accessible to children in order to avoid the risk of injury from small parts or improper use.
- Ventilation should not be blocked to prevent mould growth.
- Doors and locks should be checked regularly for proper functioning to prevent damage and the risk of injury.
- Heavy or large objects should be stored securely in the cupboard to prevent them from falling over.
- The product should be checked regularly for damage to ensure safety.
- Smaller children should be kept away from the cupboard to avoid injury from crushing or trapping.
