Please note the technical data of the products!

Article Numbers: 157050, 157049, 157048

Safety Instructions:

- The Packpool shelf can only be installed in combination with a Packpool superstructure portal or superstructure profiles.
- With an evenly distributed load, the shelf can carry up to 75 kg. Do not exceed the maximum load capacity to prevent the shelf from tipping over or breaking.
- Avoid uneven load distribution and ensure that the materials are evenly distributed to ensure the safety of the shelf.
- Ensure that the shelf is securely mounted on the steel body portals to prevent heavy objects from slipping or falling off.
- Avoid using unauthorised parts to protect the structure.
- Be aware of the possible risk of injury from sharp edges or corners of the steel brackets.
