Safety Instructions:

- Attention: Due to its mobility and use under load, the product is not suitable for use on sloping surfaces without suitable safety measures.
- Risk of suffocation: Use to transport tonnes that cannot be exceeded.
- Use the brakes: Make sure that the brakes on the castors are active when the Rolly is not being moved.
- Observe the maximum load capacity: Overloading can damage the product and possibly cause injury.
- Include safety instructions in understandable language: The safety instructions must be made available to users in a clear and comprehensible manner.
