Please note the technical data of the products!

Article Numbers: 154099, 154098, 154097, 154096, 154095, 154094, 154093

Safety Instructions:

- Protect the product from moisture, water and extreme weather conditions, especially when used outdoors.
- To avoid overloading and damage, observe the load limits: maximum 1.5 kg or 2.6 kg depending on the model.
- Use and store the appliance carefully and in accordance with the operating instructions to avoid overloading and mechanical damage.
- Place the scales on a stable, level surface to ensure accurate measurement results.
- Take particular care with electrical components to prevent electric shocks.
- The scales are not suitable for children to prevent injury from improper use.
- Carry out regular maintenance to avoid malfunctions.
- Keep the packaging and instructions for important safety information.
- If a defect occurs, contact the manufacturer immediately.
- Choking hazard due to small parts - keep the appliance away from children.
- Do not use sharp tools on wooden or plastic surfaces to protect the housing.
- Use wind protection during measurement for precise results.
