

Product Safety Information

Mobile sump tray with perforated plate wall, made of steel, capacity 2 x 200-litre drums

Please note the technical data of the products!

Article Numbers: 137582, 137581, 137580, 137579, 137578, 137577

Safety Instructions:

- Ensure that the drip tray is mounted, stable and on a level surface to prevent it from tipping or falling over.
- The drip tray is suitable for the storage of hazardous substances in GHS categories 1-4. Flammable liquids in GHS categories 1-3 can be stored.
- Only use the drip tray for the specified hazardous substances. Improper use can lead to hazardous reactions.
- Maximum load: 1000 kg/m². Do not exceed a collection volume of 215 litres and a maximum of 200 litres per drum.
- Children should not have access to the drip tray to avoid the risk of suffocation.
- The tray is not suitable for storing food.
- Carry out regular inspections for corrosion, damage and the functionality of the parking brakes.
- Wear personal protective equipment such as protective gloves and safety goggles when handling hazardous substances.
- Avoid direct contact with hazardous liquids. Wear suitable PPE.
- Take safety precautions to prevent fires and environmental damage. Keep sources of fire away and do not store flammable materials in the vicinity.
- If the drip tray is damaged, contact the manufacturer.
- Danger due to improper handling: Leaks and environmental pollution can occur.
- The ventilation of the work area must be sufficient to reduce vapours and hazardous gases.
- Dispose of oil and other hazardous substances properly and in accordance with local regulations.
- Only trained personnel should use the drip tray.
- Only use mobility functions on level surfaces or in accordance with the manufacturer's instructions.
