Please note the technical data of the products!

Article Numbers: 33440, 33439, 33438, 33413, 33412, 33411, 33394, 33393, 33392

Safety Instructions:

- Ensure that the maximum shelf load of 500 kg and the maximum bay load of 2500 kg are not exceeded.
- Only set up the shelf on a level, solid surface and stable shelves to prevent it from tipping over.
- Carry out assembly in accordance with the manufacturer's instructions to ensure the stability of the shelf.
- Avoid overloading and ensure that the load is evenly distributed to prevent swaying or tipping over.
- Check the shelving unit regularly for damage or wear and tear, particularly to the connecting elements and the structure.
- The product must be placed out of the reach of children to prevent injury from falling or crushing.
- Only use the recommended 8 mm chipboard per shelf for additional stability and protection of the shelf.
- Keep the shelf away from liquids and direct sunlight to prolong the life of the coating.
- Ensure that the entire operating instructions are read thoroughly before use and that protective clothing is worn when handling heavy loads.
- Ensure that suitable tools are used during installation and that safety precautions are observed to avoid injury.
- Use in unstable or humid environments requires special testing to avoid stability risks and corrosion.
