Safety Instructions:

- Use the security twist lock with a padlock with a shackle thickness of 5-7 mm to prevent unauthorised access.
- Place the cabinet on a stable, level surface and observe the recommended weight limit to prevent it from tipping over.
- Keep the wardrobe away from children, as small parts pose a choking hazard.
- Regularly check the stability, material damage and functionality of the hinges and locks to minimise safety risks.
- Do not use sharp objects or chemical cleaning agents to avoid damaging the material.
- The cabinet should not be placed in damp environments or near water sources to avoid corrosion.
- Follow the installation instructions carefully to ensure proper use.
- Ensure that small parts are not accessible to children to avoid the risk of suffocation.
- Avoid excessive weight on the compartments and doors to prevent mechanical damage.
- When using the cupboard doors, take care not to pinch fingers and always close the doors securely.
- Keep ventilation slots clear to prevent the formation of moisture.
- Use a safe technique when lifting heavy objects to avoid injury.
- The height can be adjusted by 20 mm to compensate for uneven floors.
- Avoid use in environments with extreme temperatures to prevent material damage.
