Safety Instructions:

- Caution: The cabinet may tip over if handled incorrectly. Ensure that the cabinet is properly assembled and secured.
- Choking hazard due to small parts, especially if handled incorrectly or by children. Not suitable for children under 3 years of age.
- Caution: The rotary bolt lock is designed for padlocks. Keep keys and locks out of the reach of children. Padlocks with a shackle thickness of 5-7 mm must be used to prevent unauthorised access.
- The stability of the bench seat should be checked regularly to avoid the risk of injury during use. Observe the maximum load capacity.
- Regularly check the stability and condition of the cabinet to avoid risks.
- Ensure that the door is fully closed at all times to avoid injury.
- Set up the product in a safe and stable environment and on a level surface to prevent it from tipping over.
- Small parts or sharp edges can pose a risk of injury, so the locker should be used by children under supervision.
- Avoid sharp objects inside and outside to prevent damage and injury.
- Use and assembly may only be carried out by adults.
- Enclosure weight of 52 kg; ensure that stability is guaranteed when opening the doors and during use.
- Avoid overloading the compartments as this can affect the stability of the clothes locker.
- Warning on the safe use of the lock to avoid injury. When using a padlock, ensure that it is childproof.
- Keep the ventilation slots clear to prevent mould growth.
- Consider installing padlocks to secure the contents of the clothes locker.
