Safety Instructions:

- Careful assembly and installation according to the instructions is required to ensure stability and safety.
- Do not use the clothes locker near water sources to minimise the risk of short circuits, rust formation and other damage.
- Keep the clothes locker in dry and well-ventilated rooms and clean it regularly to prevent mould growth and moisture damage.
- Regularly check for loose parts, wear or damage to the product as well as the door mechanism and lock to ensure stability and safety.
- Observe the maximum load on the clothes rails and the top according to the manufacturer's instructions in order to avoid breakage or deformation.
- Only use suitable padlocks or cylinder locks with a shackle thickness of 5-7 mm in order to use the rotary bolt lock correctly and securely.
- Make sure that the clothes locker is stable and secured against tipping over.
- Keep the clothes locker out of the reach of children to prevent injuries caused by improper use or small parts that can be swallowed.
- Not suitable for climbing to avoid injuries from falling.
- Close the doors correctly after use to avoid crushing and injury.
- To minimise the risk of fire, avoid placing the clothes spindles near naked flames or heat sources.
- Only suitable for indoor use. Protect from the weather.
- Avoid sharp edges or corners or mark them as a source of danger to prevent injuries.
- If used incorrectly, there is a risk of suffocation from the door and closing mechanisms. Do not insert fingers into the locking mechanisms.
- Use the product in accordance with the technical specifications and installation instructions to avoid material deterioration or instability.
- Ensure that the perforated strips for sufficient ventilation are not blocked.
- Choking hazard due to small parts, therefore not suitable for children under 3 years.
