Safety Instructions:

- For reasons of accident prevention, shelves higher than 2 metres must be connected to the wall, ceiling or to each other.
- Ensure that the shelf is standing on a level and stable surface to prevent it from tipping over.
- Avoid overloading the shelf to prevent structural and stability problems.
- Provide safety information and instructions in understandable language.
- Instructions for installation and use must be followed carefully in order to minimise hazards.
- Regularly inspect the shelving unit for wear or damage.
- When handling the shelving, there is a risk of it tipping over due to improper use, which is why stability and anchoring are extremely important.
- Avoid giving the product to children as a toy.
- Ensure that all parts are properly assembled and stable before using the shelf.
