Safety Instructions:

- Shelves over 2 metres high must be connected to the wall, ceiling or to each other to prevent accidents.
- Follow the instructions for safe assembly and use of the shelf.
- Avoid overloading the shelves and observe the maximum load capacity to prevent damage and injury.
- Shelves should be placed on stable shelves to prevent them from tipping over.
- There is a risk of collapse if used or installed incorrectly.
- Keep the area around the shelf free of obstacles to prevent falls.
- Ensure that all parts are correctly assembled to ensure stability and that no sharp-edged parts pose a risk of injury.
- The surface coating must be safe and not be exposed to harmful chemicals.
- Do not use the shelf if it is visibly damaged.
- The product must be supplied in its original packaging and with the required safety information.
- Ensure that the product complies with the general safety regulations.
- Only use the shelf for its intended purpose and do not load it beyond the maximum load capacity.
- Keep the shelf away from children's areas or secure it to prevent it from accidentally falling over.
- Regularly check the condition of the shelf and the connections for wear or damage.
- The use of additional parts not intended for the product may jeopardise safety.
