Safety Instructions:

- For reasons of accident prevention, shelves that are higher than 2 metres must be connected to the wall, ceiling or to each other in order to avoid the risk of them falling over.
- Ensure that the shelves are loaded evenly and not in excess of the permitted weight to avoid tipping and stability risks.
- Only use the accessories recommended by the manufacturer and ensure that all shelf components are stable and securely mounted.
- Protect shelves from direct sunlight, moisture and sharp objects to prevent material and surface damage.
- When assembling, follow the instructions carefully and provide a clear description of the assembly steps to ensure correct and safe assembly.
- Regularly check the assembly and condition of the shelving to ensure stability and prevent accidents.
- Make sure that heavy items are stored on lower shelf levels to ensure stability.
- Ensure that the product is used in accordance with the intended and foreseeable conditions in order to minimise risks.
- Avoid overloading and pay attention to the intended load capacity of the shelf units.
- Ensure safe use against intended conditions of use.
