Safety Instructions:

- Use suitable tools and materials during assembly to ensure stability.
- Make sure that the side supports are fitted correctly and checked regularly to ensure the stability and safety of the shelving.
- The shelving is only suitable for its intended use; do not overload the shelving and observe the maximum load capacities as specified by the manufacturer.
- Keep heavy objects on the lower shelves to prevent them from tipping over.
- To avoid damage, do not use sharp objects on the surface of the shelf. Check the shelf regularly for damage or wear.
- Ensure that the shelf is correctly installed, anchored and regularly checked for damage to prevent tipping or wobbling.
- The stability of the shelving should be checked regularly to prevent it from tipping over or collapsing.
- The product should not be overloaded. Maximum load limits must be adhered to in order to prevent the shelf from breaking or failing.
- Keep the shelf away from children. The product should be used by children under adult supervision to avoid dangerous situations.
- Clearly display safety instructions for use in the vicinity of children.
- Ensure that the installation instructions are made available to users in a clear and comprehensible manner.
- Consult a specialist for repairs or modifications to the product.
- Caution: If not installed correctly, the shelf may become unstable and cause injury.
- The shelf may only be fitted by adults.
- Hold heavy objects securely on the shelf to minimise the risk of injury from falling objects.
