Please note the technical data of the products!

Article Numbers: 157196, 157195, 157194

Safety Instructions:

- Risk of suffocation due to improper use of the counting parts.
- Risk of falling due to the high weight of the scales (55 kg).
- Observe protection against dust and splash water in accordance with protection class IP67.
- Read the operating instructions carefully before commissioning.
- For operation with a mains connection, only use the universal mains adapter supplied and ensure that the adapter has the correct voltage and frequency.
- Pay attention to battery operation; accuracy may be impaired if the battery is low.
- Do not overload the scale; do not exceed max. 3000 kg. Do not use the scale above the maximum weighing range of 600 kg for smaller models to avoid damage.
- The hold function should be used in unstable weighing conditions, especially when weighing animals.
- Make sure to distribute heavy loads evenly to prevent the scales from tipping over.
- Only use the scales on a stable, level surface to avoid incorrect measurement results.
- Avoid contact with water to prevent damage; the scale is protected against splashing water but is not designed for underwater applications (IP67).
- In the event of problems or technical defects, do not open the device yourself - contact technical support.
- The appliance is not suitable for use by children without supervision.
- Improper calibration can lead to inaccurate measurement results - use the CAL calibration programme with an external calibration weight.
- Ensure that the scale is serviced regularly to ensure its accuracy and functionality.
