Article Numbers: 137885, 137884, 137883, 137882, 137881, 137880, 137879, 137878, 137877, 137876, 137875, 137874, 137873, 137872

Safety Instructions:

- Maximum safety: Take care when storing water-polluting and flammable hazardous substances. Store only in accordance with the instructions.
- Observe the load capacity: Check the maximum load and avoid overfilling the cupboard.
- Electrical safety: No improper modifications to electrical components. Operate motorised vertical pull-outs with care.
- Fire protection: Keep sources of fire away. The cabinet offers 90 minutes of fire resistance in accordance with DIN EN 14470-1 and is certified in fire resistance class F90.
- Protection against unauthorised access: Always keep the cabinet locked, access only for authorised persons with profile cylinder and lockable vertical pull-outs.
- Automatic closing system: Observe the visual and acoustic warning signals of the automatic door closing system to avoid injury.
- Storage of hazardous substances: Take suitable personal protective measures and check regularly in accordance with the safety regulations.
- Base tray: 12.5 litre volume for collection. Regular inspection for damage required.
- Stability and installation: Ensure that the cabinet is properly installed and meets all safety requirements.
- Integrated ventilation system: Ensure sufficient air exchange at regular intervals.
- Not suitable for children: Keep electric motor components and hazardous substances out of the reach of children.
- General operation: Only use the product for its intended purpose and observe the operating instructions.
