### Safety Instructions:

- Ensure that the presentation wall is set up securely and in an upright position to prevent it from tipping over.
- Avoid using the presentation wall in areas with strong draughts or vibrations that could jeopardise its stability.
- The use of the presentation wall should be supervised by adults to minimise the risk of injury, especially for children.
- Ensure that the castors are locked in a fixed position and are only used on suitable, smooth surfaces.
- Follow the assembly instructions carefully to ensure the safety and stability of the presentation wall; regularly check the assembly and stability of the legs and castors.
- Avoid direct contact of the presentation wall with water to protect the electrical components.
- Avoid reaching into moving parts when setting up or moving the presentation wall.
- The presentation wall should only be used on firm and stable floor surfaces to prevent it from falling over.
- Do not load the presentation wall too heavily to prevent damage to the material or danger to persons.
- Keep small parts away from small children to avoid the risk of choking.
- The rounded corners provide protection, but sharp edges should be checked.
