Safety Instructions:

- Make sure that the presentation board is stable and securely mounted to prevent it from tipping over.
- Avoid moving the board when it is set up and labelled to prevent damage or injury.
- Be careful with the sharp edges or corners to avoid cuts.
- Take the product weight (5.4 kg) into account to avoid overexertion or injury during transport.
- Make sure that the board is placed on a flat surface to minimise safety risks.
- Regularly check the fastenings and castors for looseness to ensure safe use.
- Avoid transporting the presentation board over uneven surfaces to prevent it from falling over.
- Only use the board for its intended purpose to avoid injury.
- Keep the board away from children to prevent them from playing with it or being injured.
- Observe the correct folding position when assembling and dismantling the board to prevent injuries.
- Ensure that the moderator surface does not come into contact with living plants or food.
- The presentation wall should only be used on stable surfaces.
- Make sure that the castors are properly locked and unlocked to prevent them from tipping over.
- Carry out the installation in accordance with the enclosed instructions.
- Check the stability of the legs before first use.
- Avoid setting up in areas with high throughput frequency to prevent collisions.
- The board should only be set up on a firm and level surface.
- Make sure that the castors are always firmly locked when using the board to prevent it from rolling away.
- The board must not be used by children without supervision in order to avoid injury.
