Safety Instructions:

- The table must be mounted and used on a stable, level surface to prevent it from tipping over and falling.
- Observe the maximum load capacity of the table to avoid structural damage and injury.
- Pay attention to sharp edges and corners to avoid injuries.
- The table is not suitable for children under 3 years of age; supervision of children is recommended to avoid accidents.
- Protect the product from direct sunlight, moisture and water to prevent material damage.
- Avoid contact with hot objects on the surface to prevent heat damage and use coasters.
- Do not lean or jump over the edge of the table; risk of injury from tipping over.
- During assembly, fit all parts correctly and securely and check for stability to avoid accidents.
- Avoid excessive load to prevent tipping or damage.
- Adults should assemble and check the table; observe child safety during and after assembly.
- Check the product regularly for damage and do not use if damaged.
- Lift and move the table with care to prevent injury.
- Use suitable floor coverings or non-slip underlays to prevent shifting.
- Avoid sharp points and loose parts as they could cause injury, especially to small children.
- Avoid using the table as a toy and make sure that children are not left unattended.
- Restrict the use of the table to the intended conditions to ensure safety.
