Safety Instructions:

- Only clean the surfaces with disinfectants after carrying out a compatibility test on an inconspicuous area.
- Only use the desktop connection panels with suitable devices and ensure that the 6-way and 3-way desktop connection panels are used safely to avoid electrical hazards.
- Ensure that the floor levelling screws are correctly adjusted and that the table is stable to prevent falls.
- Check the table regularly for damage and tighten any loose screws to ensure stability.
- Keep mobile devices and cables away from the edge of the table and ensure that cables are laid neatly to minimise the risk of tripping.
- Only use the table on a stable, level surface and ensure that it is not used as a ladder.
- Regularly check the stability of the table frame and ensure proper assembly according to the instructions in order to minimise safety risks.
- Children should not use the table alone as there is a considerable risk of injury.
- Avoid placing hot or sharp objects directly on the tabletop and protect the surface from extreme temperatures.
- The table is height-adjustable; make sure that the joints are securely locked and that the height is set correctly to avoid the risk of injury.
- Take care not to overload the table, distribute the weight on the table top and keep heavy objects away.
- Provide instructions for the safe disposal of the product at the end of its service life.
- Not suitable for children, considerable risk of injury if handled improperly.
- Risk of electric shock if the 6-way table connection panel is used incorrectly.
