### **Safety Instructions:**

- There is a risk of suffocation when adjusting the height of the shelves. Only carry out in the intended grid (50 mm).
- Risk of slipping on uneven surfaces. Use the product on stable and level surfaces.
- Risk of injury when lifting heavy loads (max. 250 kg). Observe the safety instructions when moving the trolley.
- The parking brakes on the swivel castors must be secured before use and during loading/unloading.
- Do not exceed the maximum permissible load of 100 kg per shelf. Observe the total weight of 250 kg to prevent tipping.
- Always use both hands when pushing the trolley to minimise the risk of tipping over.
- Load shelves evenly to avoid tipping.
- Trolley is intended for indoor use only. Avoid weather-related influences.
- Do not use for the transport of persons or hazardous materials.
- Regularly check for mechanical damage or wear.
