Safety Instructions:

- Only clean surfaces with disinfectants after carrying out a compatibility test on an inconspicuous area.
- Ensure that electrical connections are properly installed to avoid short circuits, electric shocks and fire hazards.
- The table height should be set between 650 mm and 850 mm to ensure comfort and safety, and the levelling screws should be securely attached.
- Avoid overloading the table connection panel or the table with more devices than permitted in order to prevent electrical hazards and structural damage.
- Regularly check the stability of the table and its components, such as frames, joints and screws, to prevent it from wobbling or tipping over.
- Keep children away from cables, sockets and small parts to minimise the risk of suffocation and injury.
- Avoid sharp edges or corners, as they can pose a risk of injury.
- The product may contain allergens, therefore test for skin compatibility before use.
- To protect the table, do not use abrasive or wet cleaning agents on the surface and keep the table away from moisture and extreme temperatures.
- Ensure that the table is used correctly and safely, only for its intended purpose and in accordance with the safety instructions to avoid structural damage and accidents.
- Only use the table on level surfaces and ensure that the legs are securely on the floor to prevent tipping.
- Avoid using the table in other locations than intended, e.g. not near water, open flames or as a play platform.
- Provide clear, understandable safety instructions and warnings and label the product with the necessary information.
- During installation, ensure that the screws are tightened correctly and securely to guarantee stability and safety.
