Safety Instructions:

- Check the compatibility of cleaning agents and disinfectants on a less visible area.
- Ensure that electrical connections and their operation are carried out by qualified personnel in order to avoid electric shocks.
- Avoid excessive loads on the table frame and table top; observe the maximum load capacity and do not overload the table top.
- Ensure that the table is stable and secure on a level surface to prevent it from wobbling and tipping over; check the floor levelling screws and levelling regularly.
- Keep electrical connection panels protected from moisture and ensure that all power connections comply with the applicable safety standards.
- Avoid using sharp objects on the table surface, as this could scratch the melamine resin-coated surface.
- Ensure that the table height adjustment works properly and is only carried out by authorised personnel to avoid injury.
- Prevent heavy or sharp objects from falling onto the table or being placed near the edges to avoid damage or injury.
- The product is only suitable for indoor use and must be protected from external weather influences.
- Keep children away from the table to prevent the risk of falling and crushing.
- Check the stability of the table, all connections and connections before use.
- Smaller parts or packaging should be kept away from children to avoid the risk of suffocation.
- Avoid overloading the desktop connection panel; only use compatible electronic devices.
- Protect the table surface from extreme temperatures and moisture to extend its service life.
- Clean the surfaces regularly to avoid the risk of slipping.
- Keep the table away from sources of fire and have qualified persons carry out assembly and adjustment to prevent injury and damage.
- Keep the installation instructions and safety information easily accessible.
- Avoid aggressive chemical cleaning agents so as not to damage the surfaces.
