Safety Instructions:

- Choking hazard due to small parts in the accessories, magnets, small parts of the attachment and board markers, especially for children under 3 years. The product is suitable for adults and children aged 14 and over.
- Use only for the intended purpose and under adult supervision; the product should be supervised, especially in the vicinity of children.
- Do not use any sharp objects or aggressive/abrasive cleaning agents on the surface to prevent scratches or damage. This applies in particular to the nano-coated surface to avoid damaging the Nano Clean™ coating.
- The use of unauthorised or unapproved board markers can damage the surface or pose health risks.
- Ensure that the wall mounting is carried out in accordance with the instructions and that the walls have sufficient load-bearing capacity to prevent falling. Take care to correct the fixing materials to minimise the risk of accidents.
- Safety information and instructions should be easy to understand and in simple language; recall information should be easily accessible.
- When using the whiteboard, ensure that it is not placed near fire, heat or water sources in order to avoid damage, melting or electrical damage.
- Improper use or incorrect assembly as well as intensive use can lead to injuries or a shortened service life; follow the assembly instructions carefully and check the stability and fastenings regularly.
- The product should be kept out of the reach of children to avoid potential hazards.
- Please observe the disposal instructions for old appliances in order to comply with environmental regulations.
