Safety Instructions:

- Risk of suffocation due to improper use of the electric height adjustment mechanism.
- Risk of electric shock due to improper connection or use of the product. Protect electrical parts from moisture and only use the control panel with dry hands.
- Risk of injury due to improper handling of the extendable tabletop and trapping of body parts during height adjustment.
- Safety requirements regarding the stability of the table: Set up in accordance with the instructions and only on a stable, level surface. Ensure stability to avoid injuries and the risk of tipping over.
- Load capacity of the table is 80 kg dynamic, 120 kg static. Use in accordance with the load limits to avoid structural damage.
- Do not adjust the height of the table above the permitted level to avoid damaging the motors. Take care when adjusting the height to minimise noise.
- The height of the table should be adjusted to the desired position before use.
- Children should not play near the table without supervision to avoid possible injury. Supervision is particularly important when the table is used by children.
