Safety Instructions:

- Drawers must not be loaded beyond the maximum load capacity of 25 kg, as overloading will result in damage.
- Before use, check the drawers for correct operation and the presence of damage.
- Adjust the floor glides to ensure stability and safety on uneven floors and to prevent tipping.
- When closing the drawers, ensure that no body parts are trapped.
- Check the product regularly for damage and replace defective parts immediately.
- Strictly follow the manufacturer's instructions during installation to avoid injury.
- Position the container securely to prevent it from tipping over.
- Use only for the intended purpose, misuse can lead to damage.
- Keep small parts and sharp objects away from children to avoid injuries and the risk of choking.
- Keep the container away from water, heat sources and damp environments to prevent material damage.
- Check the lock regularly and ensure that the container is always locked to prevent unauthorised access.
- Wear suitable protective gloves during assembly and use to avoid injury.
- Suitable for use in industrial environments to prevent injuries.
- Take care with sharp edges during assembly and use to avoid injury.
- Correctly adjust the height-adjustable floor glides to ensure stability on uneven floors.
