Safety Instructions:

- Risk of suffocation from the cylinder lock if used incorrectly. Ensure that animals or children do not have access and only use the keys provided. Check the functionality of the lock regularly.
- Observe correct handling and caution when closing the drawers and pull-outs to avoid the risk of injury. Do not exceed the load limits.
- Only use the product on a stable, level surface and secure it to prevent it from tipping over. Ensure that the stability of castors and fixings is checked regularly.
- Do not overload the product to avoid stable use and tipping over. Do not use the material pull-out and drawers beyond the maximum load capacity.
- Children must not come into contact with the product unsupervised. Keep small parts and accessories out of the reach of small children to avoid the risk of choking. Caution, small parts can pose a choking hazard.
- Protect the product from extreme temperatures and moisture to prevent damage.
- Use suitable lifting and carrying techniques during transport and assembly to avoid injury. Ensure that the mobile pedestal is suitable for the intended use and storage.
