Safety Instructions:

- Cabinet not suitable for children under 3 years of age due to small parts that can be swallowed. Keep small parts out of the reach of children to avoid the risk of choking.
- If used incorrectly, there is a risk of injury from sharp-edged parts and pulled-out drawers. Observe the maximum load capacity of the shelf of 50 kg.
- The product should only be placed on a stable, level surface to prevent tipping or wobbling. Place the cabinet on firm ground and correctly levelled.
- Avoid using force on doors and drawers to prevent mechanical damage. Do not open doors more than 110 degrees.
- Never overload drawers and doors to prevent them from falling out or breaking. Distribute heavy or large objects evenly.
- Read the installation instructions and safety instructions carefully and carry out the installation in accordance with the instructions to avoid any uncertainties.
- Regularly check the stability of the cabinet to prevent it from tipping over and causing damage.
- When storing valuables, lock drawers to prevent unauthorised access. Store in a key-proof place.
- Safety instructions should be provided in an understandable language, and European standards and national requirements should be observed.
- Take care when using near sources of heat and moisture.
- The lockable doors and drawers should remain closed when the cabinet is not in use to prevent unauthorised access.
