Safety Instructions:

- The workshop trolley should not be overloaded - observe the maximum total load of 450 kg to avoid tipping over and damage.
- Avoid pulling out several drawers completely at the same time to prevent the trolley from tipping or falling over.
- The workshop trolley is not suitable for use by children - danger due to improper use.
- The drawers are not suitable for items weighing more than 40 kg. Overloading may result in damage or injury.
- Secure the workshop trolley with the central locking system when it is not in use to prevent theft and unauthorised access.
- When using the workshop trolley, make sure that the brakes on the castors are activated when the trolley is stationary, and when transporting the trolley, make sure that the brakes on the rear castors are activated to maintain control.
- Ensure that the trolley is positioned on a stable, level surface to prevent it from sliding or tipping over.
- Avoid using the workshop trolley in areas with liquids to prevent the risk of slipping.
- Lift heavy loads correctly during use to avoid injuries caused by incorrect lifting.
- The trolley should be checked regularly for signs of wear or damage, especially the brakes on the castors.
