Safety Instructions:

- The locker is intended for indoor use only.
- Always lock the locker with a padlock to prevent unauthorised access. Only use compatible padlocks with the security twist lock and ensure that it is regularly checked for functionality.
- Avoid overloading the locker to ensure stability. The locker should not be loaded with excessive loads or have heavy objects on top to prevent it from tipping over.
- Make sure that the ventilation slots are not blocked to ensure air circulation and prevent damage.
- Keep the locker away from direct contact with water or damp conditions to prevent corrosion.
- Ensure that the opening angle of the door is not obstructed by neighbouring lockers and that it is not forced open to prevent damage.
- Ensure that the door of the locker is fully closed if no padlock is used to prevent unauthorised access.
- Inspections of the spindle for damage or signs of fatigue are recommended on a regular basis to ensure functionality and safety.
- Pay attention to the edges and corners of the cabinet to avoid injury. Sharp edges should be avoided during use.
- Prevent clothing or personal items from becoming physically trapped.
- Assembly should be carried out by a qualified person to ensure stability.
