

Product Safety Information

Boltless shelving heavy duty, complete shelving, with 5 shelves, 1800, 2000, 2200, or 2400 mm high, galvanized

Manufacturer/Responsible Person: SZ Metall GmbH & Co. KG, Schillenbergrweg 12, 59846 Sundern (Sauerland), Deutschland
E-Mail: info@szmetall.de

Please note the technical data of the products!

Article Numbers: 32455, 32454, 32453, 32452, 32450, 32449, 32448, 32447, 32446, 32445, 32444, 32443

Safety Instructions:

- Secure shelving against tipping (wall or floor anchoring) with height/depth ratio $\geq 5:1$.
- Maximum load capacity per shelf: Do not exceed 175 kg with evenly distributed load.
- Do not exceed a total bay load of 875 kg with an evenly distributed load.
- Place the shelf on a level surface to ensure stability.
- Only insert additional shelves if the permissible bay load of 875 kg is complied with.
- Smaller parts can be stowed away on the shelf, avoiding the risk of suffocation for small children.
- Ensure proper installation and anchoring to prevent injuries.
- Before assembly, ensure that all parts are correctly assembled.
