Safety Instructions:

- Do not exceed the static load capacity of the network enclosure by more than 7,500 N to avoid overloading.
- Ensure that the cabinet is securely installed on a stable, level surface.
- Only lift when empty using a four-point crane beam and M10 eyebolts; installation by specialised personnel recommended.
- Set up the product in accordance with IEC 297-1/2; provide safety information and technical documentation.
- Take care when handling the toughened safety glass to avoid breakage and scratches.
- Install cable entries correctly to avoid damage and tripping hazards.
- Cabinet suitable for dry indoor areas in accordance with IP20; guarantee protection against moisture and dust.
- Product is not intended for children; avoid choking hazard due to small parts.
- Ensure proper installation and securing before use.
- Use suitable protective equipment during transport.
- Take care when handling sharp edges and heavy parts.
