Safety Instructions:

- Observe the maximum permissible static load of 7,500 N.
- The enclosure fulfils protection class IP20 and is not suitable for applications in damp environments.
- Regularly check the stability and stability of the cupboard, especially when subjected to lateral loads.
- Secure all installed components against unauthorised access.
- Avoid placing the cabinet near heat sources or in direct sunlight to prevent damage.
- Attention: The server cabinet is heavy. Please secure the cabinet to prevent it from tipping over.
- Ensure that the server enclosure is positioned on a level surface.
- Cables should be laid in such a way that they are not damaged or pose a tripping hazard.
- Do not make any modifications to the power supply system of the server enclosure without specialised knowledge.
- Passive ventilation must not be blocked to prevent the appliances from overheating.
