Please note the technical data of the products!

Article Numbers: 195572, 195571, 195570, 195569

Safety Instructions:

- Caution during assembly: The plinth requires at least one person and suitable lifting techniques due to its size and weight. Use protective gloves to avoid injury from sharp edges.
- Maximum static load: 750 kg. This load must not be exceeded in order to avoid damage or injury.
- Secure the base on a stable and level surface to prevent it from tipping or falling over. Ensure that the base is securely mounted.
- Avoid contact with water or damp conditions to prevent rust formation. Sharp objects should be avoided to prevent damage to the powder-coated surface.
- Assembly should only be carried out by adults in accordance with the enclosed instructions to ensure that all parts are correctly and securely fastened.
- Ensure that the product parts are completely intact before assembly.
- Keep children away from assembly and use.
- Use suitable aids during transport to avoid injuries caused by heavy loads.
