Safety Instructions:

- Ensure that the steel plinth is securely and properly installed to ensure the stability of the furniture and prevent it from tipping over.
- Use only on stable, level surfaces to ensure stability.
- Maximum width is 400 to 1600 mm for shelves and cabinets. Do not use beyond this width.
- The maximum load capacity of the steel base must not be exceeded in order to avoid structural damage.
- Carry out installation in accordance with the manufacturer's instructions to avoid injury. Use suitable tools and safety measures such as personal protective equipment (e.g. gloves).
- Keep the product out of the reach of children to avoid the risk of choking.
- Regularly check the stability and safety of the shelving unit or cupboard, especially for heavy items of furniture, and for signs of damage or wear.
- Avoid contact with water to prevent rust formation. Not suitable for outdoor use.
- Only use the plinth in conjunction with suitable furniture from the TETRIS WOOD range or the recommended shelving and cupboard systems.
- The product is not suitable for children under 3 years of age as it may contain small parts that pose a choking hazard.
- Note on the use of the product: It is a steel base and not suitable for sitting or standing.
- For indoor use only to ensure durability and stability.
- Only use the product in accordance with the installation instructions in order to minimise risks. Consult a specialist if you are unsure.
- Product should contain clear instructions and safety information that is easy for consumers to understand.
- Use appropriate safety precautions when using the plinth and when loading the furniture to avoid injury.
