Safety Instructions:

- Only use the office chair for the applications described in the manual.
- Only use the chair on stable, level surfaces and on suitable floors (carpet or hard surface).
- Keep the area under the chair free of obstacles to avoid tripping hazards.
- Check the chair regularly for damage and check the moving parts for wear, especially the safety castors and the safety lift.
- The maximum load capacity is 120 kg. Do not exceed this weight to ensure stability and safety.
- Adjust the seat height and seat depth according to the instructions to ensure ergonomic comfort and avoid pressure points.
- Avoid adjusting the seat height while you are sitting on it and adjust the armrests correctly to avoid arm pain.
- Longer periods of sitting should be interrupted regularly; the recommended sitting time is up to 8 hours to reduce health risks.
- Ensure that children are not sitting on the chair unsupervised and make sure that individual adjustments are made when the chair is used by people with special needs.
- The chair is suitable for people weighing between 45 and 120 kg; not suitable for children under 3 years of age due to small parts and choking hazard.
- Ensure that the backrest is correctly adjusted and not overloaded to avoid injury.
- Provision of comprehensive safety, installation and maintenance instructions in understandable language is required.
- The office chair must be designed in accordance with general safety standards; it is GS-tested to ensure safety under normal conditions.
- Make sure that the castors are suitable for all types of floor to prevent wobbling or tipping over.
- There is a risk of slipping and tipping due to improper use; adjust the backrest and seat height with care.
- Provide correct instructions for use to avoid injury when adjusting the turning mechanism.
- Avoid moving the chair abruptly to prevent falls.
