Safety Instructions:

- Ensure that the locker is stable on a level surface to prevent it from tipping over.
- The plastic feet are adjustable and should be checked regularly to ensure stability.
- The locker is not intended for the storage of flammable, hazardous materials or for outdoor use.
- Only use the intended accessories and do not load the shelves beyond their load-bearing capacity to avoid damage.
- Make sure that the doors of the locker close securely to prevent injuries and secure them with locks against unauthorised access if necessary.
- Small parts can be a choking hazard for children and the locker is not suitable for children without supervision.
- Sharp edges and corners can cause injuries; please handle with care.
- Regular inspection of the locks and the condition of the locker for damage and functionality is recommended.
- Keep the locker dry and do not block the ventilation holes to prevent corrosion and ensure good air circulation.
- The locker must not be overloaded and all items used should be evenly distributed to ensure stability.
