Safety Instructions:

- Choking hazard due to loose parts or small parts, especially in the seat area and moving elements.
- Fastenings must be securely attached to prevent injuries.
- When adjusting the height and using the seat mechanism, prevent improper use and ensure stability.
- Ensure that the industrial swivel chair is placed on stable, level floors to prevent it from tipping over.
- Observe maximum load capacity: 120 kg to avoid structural damage.
- Compliance with the recommended seat height adjustment for comfort and healthy posture.
- Regularly check the castors for wear or damage to prevent accidents.
- Avoid the risk of slipping due to improper use of the castors, especially on smooth surfaces.
- Use the safety gas spring in accordance with the manufacturer's instructions and check its function regularly.
- Only use suitable cleaning agents for easy-care artificial leather to prevent damage.
