Article Numbers: 113002, 113000, 112999, 112998

Safety Instructions:

- Make sure that the table is placed on a stable surface to prevent it from tipping or falling over.
- The table is intended for indoor use only.
- Observe the maximum load of 60 kg dynamic and 100 kg static.
- When using the electric height adjustment, no objects should get between the table top and the frame.
- Ensure that the power supply meets the requirements and that the motor is not overloaded.
- Take care not to load the table above the maximum load (60 kg dynamic, 100 kg static) when using the electric height adjustment.
- Operate the electric motor carefully to avoid injury.
- The desk must be properly assembled and tested before use to ensure safety.
- The instructions for use should contain clear instructions on the safe use and maintenance of the product.
- Avoid electric shocks by using the power supply provided by the manufacturer and keep electrical components dry.
- Do not pressurise the table when adjusting the height to avoid crushing.
- Read and follow the instructions for use to avoid improper use.
- Make sure that the desk is correctly assembled to ensure stability.
- Avoid overloading the table beyond the specified maximum load capacity of 100 kg.
- Take particular care when operating the height-adjustable table.
- Keep children away from the table during electrical adjustment to avoid injury.
- Prevent objects from becoming trapped in the area of the electrical components.
- Do not use the desk if it is visibly damaged or does not function properly.
- Remove all cables and other objects that could cause tripping hazards.
