Safety Instructions:

- Use only in the intended temperature range of -40 to +120°C.
- Ensure that the box is tightly closed during transport to prevent leakage.
- Avoid contact with sharp objects and mechanical damage in order to prevent damage and maintain the insulation capability.
- The box is not suitable for use in direct contact with food; suitable containers must be used, but it is approved for contact with food if it is cleaned properly.
- The box is suitable for use in cold chains, but the HACCP standards must be observed.
- Make sure that the box cannot tip over when used with hot food to avoid burns.
- To avoid material damage, do not overheat the Thermobox or use it in extreme temperature ranges.
- The box does not contain any parts that are dangerous for children, but it should always be used under adult supervision.
