Article Numbers: 461266, 461265, 461264

Safety Instructions:

- Caution: Danger from liquid fuels such as diesel or heating oil. Avoid dripping, spillages and fire hazard. Wear suitable protective equipment (gloves, safety goggles).
- Caution: There is a risk of fire and explosion if handled incorrectly. Read and follow the safety information in the operating instructions.
- Do not make any changes to the tank or the safety devices. The tank should only be filled with the prescribed, compatible fuels.
- Store the tank in a safe place to prevent environmental damage in the event of leaks. Follow the regulations for the transport and storage of dangerous goods in accordance with the ADR/RID/IMDG Code. Labelling in accordance with the ADR/RID/IMDG Code for international transport of dangerous goods.
- Please ensure that the tank is protected against spillage or leakage. In the event of an accident or leak, take appropriate measures immediately and inform the relevant authorities.
- The tank must be checked regularly for signs of damage or corrosion. Regular inspections of the tank are mandatory due to its sensitivity to corrosion.
