

Product Safety Information

USB flash drive C5 3.0, up to 4.8 GB/s, duplex capable, various storage capacities & colours

Manufacturer/Responsible Person: E.T. Technologies (Deutschland) GmbH, Rheinpromenade 8, 40789 Monheim, Deutschland
E-Mail: info@et-tecs.de

Please note the technical data of the products!

Article Numbers: 170587, 170586, 170585, 170584, 170583, 170582, 170581, 170580, 170579, 170578, 170577, 170576

Safety Instructions:

- Do not use near water or in a damp environment to avoid short circuits and the risk of electric shock.
- Protect the USB stick from extreme temperatures, direct sunlight and overheating.
- Only use the USB stick with compatible devices (USB-A or USB-C ports) and do not make any unauthorised modifications.
- Keep out of the reach of children to avoid the risk of choking on small parts.
- Correct removal of the USB stick by the programme to prevent data loss and special care when handling
- avoid mechanical stress.
- Protect from moisture, dust and excessive pressure.
- Regularly check the appliance for external damage and malfunctions; contact the manufacturer in the event of any abnormalities.
- Ensure secure data transmission, do not disconnect the device from the mains during use.
- Take precautions against electrostatic discharge (ESD), e.g. by touching an earthed metal object before use.
- Not for use by children under 3 years of age.
- Carry out regular data backups if there is a risk of data loss.
- Provide safety instructions and user manuals in understandable language and ensure use in accordance with the instructions provided.
- Do not subject the appliance to mechanical stress (e.g. dropping).
