Article Numbers: 460984, 460983, 460982, 460981, 460980, 460979, 460929, 460928, 460927, 460926, 460925, 460924

Safety Instructions:

- Safe storage of substances hazardous to water in accordance with GHS 1-4.
- Only store hazardous substances of GHS 1-4 in the drip tray.
- When storing flammable liquids of GHS 1-3, ensure potential equalisation/earthing.
- Check the drip tray regularly for leaks and tightness.
- Note the collection volume of the drip trays: 480 litre and 320 litre models available.
- Use natural ventilation to avoid hazardous gases.
- For outdoor use: earthing/potential equalisation required.
- Professional final assembly by an authorised specialist company required.
- Use suitable personal protective equipment when handling hazardous substances.
- Risk of suffocation and fire due to improper handling of water-polluting substances and flammable liquids.
- Carry out regular maintenance and inspection of the systems, including ventilation systems and seals.
- Only use the product for its intended purpose in order to avoid hazards.
- Restrict access to the storage rooms to authorised persons.
- Read and observe safety data sheets and user instructions.
- Ensure safe use of the double swing gate and pallet truck/forklift.
- Check the product regularly for material wear and corrosion.
- Storage of hazardous substances requires special safety precautions and protective measures.
- Prevent unauthorised access.
