Safety Instructions:

- Wear suitable protective equipment when handling hazardous substances.
- Use drip tray and check regularly for leaks and function, 1000 litre capacity recommended.
- Do not load shelf containers above maximum storage capacity, including the use of pallet trucks/forklift trucks for movement.
- Ensure earthing/potential equalisation when storing flammable liquids of GHS 1-3 outdoors.
- Only trained personnel should handle the product.
- Ensure safe storage of water-polluting substances of GHS categories 1-4 and flammable liquids.
- Shelf containers should not be used for explosive substances and should only be used for their intended purpose.
- Ensure that the container is correctly closed and assembled before use.
- Check the corrosion resistance of the material regularly.
- Observe the safety data sheets of the stored substances and take safety precautions.
- Regular inspection of seals and drip pans to prevent leaks, logging recommended.
- Provide product labelling and instructions in the local language.
- Only grant access to the product to authorised persons, always lock the double-leaf door when accessing.
