Article Numbers: 461008, 461007, 461006, 461005, 461004, 461003, 460954, 460953, 460952, 460951, 460950, 460949

Safety Instructions:

- Use and installation only by trained specialist personnel. Require regular training in the safe handling of hazardous substances.
- Only use shelf containers for water-polluting substances of GHS categories 1-4. Only store flammable liquids of GHS 1-3 with activated potential equalisation/earthing.
- Check drip pans regularly for leaks or damage. Observe safety precautions when storing and handling hazardous substances.
- Ensure that the outdoor shelving container is properly earthed, especially in the case of flammable liquids.
- To ensure safety, always close sliding gates securely to prevent unauthorised access.
- Regularly check and document the condition of the material to prevent corrosion. Protect steel surfaces through regular maintenance.
- Install and maintain the product in accordance with local regulations. Read and follow all enclosed safety instructions.
- Only unload on areas accessible to lorry-trailer combinations. Use suitable means of transport such as pallet trucks or forklift trucks.
- Take precautionary measures in outdoor areas: Protect from direct sunlight; activate earthing/potential equalisation.
- Any leaking hazardous liquids must be disposed of immediately and in accordance with regulations. Handle collected substances safely.
- Accessories such as fire extinguishing systems and lighting are optionally available. Ensure operational readiness and safety through regular inspections.
- Use personal protective equipment (PPE) when handling harmful substances.
- Only utilise outdoor material storage options in compliance with all safety precautions and environmental conditions.
